Fitness Program: focuses on intense sand and sprint work, medicine balls, coordination and balance drills, combined with extensive flexibility work to increase our players' core strength, balance and explosion to the ball. We ***Cross Train*** with different disciplines, such as basketball, soccer, water basketball and volleyball to broaden our players' athletic abilities.

High Performance Fitness Package

This package is for players who are highly motivated and want to make a dramatic difference in their training while they are at Weil Tennis Academy. Players involved in this program will have the opportunity to follow ultra-customized and individualized fitness training under the supervision of Patrick Muller, Fitness Director at the Weil Tennis Academy.

They will train in groups of 3-4 players which will give Coach Patrick the opportunity to be more specific and provide more attention to the players. These training sessions will last 1h and 15m and be 2 times per week.

This small group training is the most efficient way to train for tennis because it allows the players to work on their strength, agility, endurance, speed and flexibility which are necessary if they want to reach their top level. This kind of training on a regular basis will give optimal results to each of the players.

These sessions will also allow for plenty of time to work on injury prevention and recovery, which should be taken very seriously if a player wants to achieve his/her goals. Pre-rehabilitation exercises, core strength and stretching are often neglected by players and this setting allows for all these areas to be worked on a weekly basis which will in turn help the coach keep the players as healthy as possible.

Players who sign up for this package will also receive a more specific Fitness Evaluation at the end of their training time at Weil Tennis Academy that will allow for a more specific and individualized fitness program. Each player will then receive a Personalized Fitness Program to take home with them which will allow them to keep working on their fitness for 4 to 5 hours a week. These programs will be tennis specific and individualized to the player's needs. It will come with instructions and illustrations to make it as easy as possible to follow.

With this performance package, players will have the best fitness training experience possible, with customized sessions that will work on strength, agility, speed, endurance, flexibility and recovery.

This is what is included in the performance package:

- 2 sessions of 1h 15 minutes per week in groups of 4 max before or after practice

- Specific and complete Fitness Evaluation for tennis

- Individualized Fitness Program to take home

- Best attention and fitness training during their time at the academy

- Cost: \$200 per week
